

Street Committee meeting minutes from 10/20/16

Meeting called to order at 5:30 pm on Caroline and Jensen Street corner . Committee members Randy, Steve and Dwight were present along with George and Mary Empey and Dan and Shiela Kraft.

The issue on hand was storm water which flows from several parts of Athens into this particular Area creating problems for several landowners. After discussion about making a larger ditch with Rip rap and somewhat re-routing water way to Pond Street , it was determined this option Would only solve the problem short term . Next option was for storm sewer to be installed on private Property from Caroline Street to Pond Street and also catching the water from the alley directly north Of Empey's east corner of lot. We Informed George Empey that his fence may need to be removed for Storm sewer option and large tree on west end of his lot will probably need to be removed .

Meeting moved to village board room at 5:55 pm with only committee members attending. Randy Was to call Nick at MTS to get an estimate on engineering cost for storm sewer. Motion by Steve and seconded by Dwight to recommend to Board that storm sewer be installed to solve this issue.

Motion passed 3-0.

Street lights in Industrial park , there are 7 of the 13 street lights out at this time , committee felt that Waiting for Mount View road project was to long to be without lights. Street lights were pulled out of MSA's engineering contract anyway . Motion by Dwight second by Steve to recommend getting Quotes On LED heads to fit onto existing poles also including to see if existing wiring is sufficient to support new fixtures.

Motion passed 3-0

Snow removal bids were discussed . Motion by Dwight with second by Steve to award snow removal To Janke General Contractors per their bid prices. Motion passed 3-0

Motion to adjourn at 6:20 pm by Steve with second by Dwight . Motion passed 3-0 .

Randy Decker Street Chairman
